

The Quality of Life Research Center, Copenhagen (host),
OOC - The Organization for Information About Corona Virus COVID-19 (sponsor) &
DFF - Denmark's Free Television (Danmarks Frie Fjernsyn) (distributor)

invite you to the

1st International Conference on COVID-19 – Dangers, Lockdowns, Vaccines & Prevention

**ONLINE AND NYTORV, COPENHAGEN OLD CITY,
May 17th 2021 - 9.30-13.30 (UCT+2) and
May 18th 2021 - 10.00-15.00 (UCT+2)**

May 17 9:30 - 13:30

1. Prof. Dr. Sucharit Bhakdi and Dr. Søren Ventegodt: COVID-19 Pandemic
2. Prof. Dr. Ulrike Kämmerer: The virus and the test
3. Prof. Dr. Harald Walach and Prof. Dr. Christof Kuhbandner: The preventive measures
4. Prof. Dr. Martin Haditsch: Principles of vaccination

May 18 10:00 - 15:00

1. Dr. Wolfgang Wodarg: Meaningful versus meaningless vaccinations
2. Prof. Dr. Dolores Cahill: Short- and long-term dangers of COVID-vaccination
3. Dr. Mike Yeadon and Prof. Dr. Andreas Sönnichsen: Ethics in medicine and pharmaceutical science
4. Dr. Wolfgang Wodarg and Dr. Søren Ventegodt: The Big Picture
5. Dr. Reiner Fuellmich and Dr. Renate Holzeisen: Legal means to protect the populace

Moderator: Prof. Dr. Sucharit Bhakdi, Germany

Free online conference – stream it from www.denmarksfree.tv

The eight lectures from the conference and the subsequent debates will be recorded and internationally broadcasted by the DFF (Danmarks Frie Fjernsyn) – www.DenmarksFree.TV / www.Danmarks-FrieFjernsyn.dk. **DFF will broadcast the conference and all parts of it, in films, TV-presentations, radio programs etc.**

Aim of the conference

This free online conference brings you the leading scientists' answer to this burning question:

Is there a real, dangerous corona pandemic going on, and are the political corona measures we see in most countries, including the vaccination programs, productive or counterproductive to the populations health, happiness and well-being/global quality of life?

What does science tell us about SarsCov-2 and COVID-19 regarding:

- The danger - is there a real corona pandemic or has the danger been overestimated?
- The lockdowns etc. - are the political actions related to the corona pandemic justified by science?
- The COVID-19 experimental vaccines and gene-therapies - are they rational? Are they safe? How do they work, and what do we know about the technology from animal trials?

The world's leading experts in corona viruses and COVID-19 give the best possible scientific answers to the questions above, and many more.

Who is it for?

We welcome all doctors, nurses, health professionals, politicians, police officers, media professional etc. to participate. The public with general interest in these questions is also welcome to participate. Physical participation for free is also possible on Nytorv, where we have applied for acknowledgement of this conference as "opinion-making assembly" ("meningsdannende forsamling").

Online participation happens by streaming from www.danmarksfriefjersyn.dk and a number of other platforms, to be announced from this page.

Contact

For the media: for more information, call 0045 2066766 or send us an email to info@denmarksfriefjersyn.dk.

For contact to the organizers, please write to ventegodt@livskvalitet.org.

About the moderator and chairman of the Organizing Committee, Prof. Dr. Sucharit Bhakdi

Sucharit Bhakdi is an award-winning immunologist and virologist and one of the most cited German immunologists. He has made a number of major scientific discoveries, amongst others within the complement system.

Bhakdi was born in Washington, DC and studied medicine at the University of Bonn in Germany, where he received his doctorate in 1970. He was a postdoctoral researcher at the Max Planck Institute for Immunobiology and Epigenetics in Freiburg from 1972 to 1976 and at The Protein Laboratory in Copenhagen from 1976 to 1977. He joined the Department of medical Microbiology at Giesesen University in 1977 and was appointed associate professor in 1982. He was appointed President of medical Microbiology at the University of Mainz in 1990, a position he occupied until 2012.

Dr. Bhakdi has published over three hundred articles in the fields of immunology, bacteriology, virology and parasitology, for which he has received several awards; furthermore, he has received the honorable Order of Merit for Rheinland-Pfalz.

Sucharit Bhakdi is coauthor of: "Karina Reiss Ph.D. & Sucharit Bhakdi MD. Corona, False Alarm? Facts and Figures." Originally published in Germany by Goldegg Verlag GmbH, Friedrichstraße 191 • D-10117 Berlin, in 2020 as Corona Fehlalarm? Chelsea Green Publishing Pub.

Organizing Committee

Prof. Dr. Sucharit Bhakdi, Germany (Chairman of the Organizing Committee)
Director Dr. Søren Ventegodt, Denmark
Prof. Niels Jørgen Andersen, Norway
Prof. Joav Merrick, Israel
Prof. Dr. Dolores Cahill, UK

OOC's Scientific Committee (Establish 2020-06-12)

Prof. Dr. Sucharit Bhakdi
Dr. Leonard Coldwell
Dr. med. Peer Eifler
Prof. Dr. med. Pietro Vernazza
Prof. Dr. rer. nat. Stefan W. Hockertz
Prof. Dr. med. Jay Bhattacharya
Dr. Søren Ventegodt

Moderator

Prof. Dr. Sucharit Bhakdi, Germany

Host

Quality-of-Life Research Center, Copenhagen Denmark

Speakers (in order of appearance):

Prof. Dr. Sucharit Bhakdi

Sucharit Bhakdi, Professor Emeritus of Medical Microbiology and Immunology and Former Chair, Institute of Medical Microbiology and Hygiene

Dr. Søren Ventegodt

Søren Ventegodt holds the European Masters degree in comple-

mentary, psychosocial and integrative medicine and works as a researcher in holistic medicine and quality of life.

Prof. Dr. Ulrike Kämmerer

Virologist and immunologist at the University of Würzburg.

Prof. Dr. Harald Walach

Harald Walach is Professor at the Medical University of Poznan, Poland and at the Medical Faculty of the University Witten-Herdecke, Germany.

Prof. Dr. Christof Kuhbandner

Professor of Psychology, University of Regensburg, Germany

Prof. Dr. Martin Haditsch

Martin Haditsch currently works at the TravelMedCenter Leonding and the department of microbiology at the Labor Hannover MVZ GmbH.

Dr. Wolfgang Wodarg

Dr. med. Wolfgang Wodarg is an internist, pulmonologist, social medicine specialist, doctor for hygiene and environmental medicine and was the head of a health department for many years.

Prof. Dr. Dolores Cahill

Professor Dolores Cahill is at the University College Dublin.

Dr. Mike Yeadon

Dr. Mike Yeadon, former Chief Scientific Advisor, Pfizer

Prof. Dr. Andreas Sönnichsen

At the Medical University of Vienna, General Practice and Family Medicine Professor

Dr. Reiner Fuellmich

Dr. Fuellmich is a lawyer and has already taught as a professor and lecturer at universities in Germany and Estonia.

Dr. Renate Holzeisen

The business lawyer and economist Dr. Renate Holzeisen from South Tyrol trained in mathematics and statistics.

This conference will seek to answer a number of crucial questions regarding COVID-19 and SARS-CoV-2 viruses

There are many preconditions that must be met for it to make sense to make corona special laws and lockdowns, with the gross violations of constitution, human rights and fundamental rights that this entails.

There must initially be a virus that we can identify as the cause of the pandemic; then it must be shown that there is actually danger ahead, i.e. excess mortality in society; then it must be shown that this excess mortality is due to the virus in question, and this requires i.e. that we can test scientifically unambiguously and clearly for viruses; next, we must clarify the occurrence of the disease and death the virus causes primarily through autopsies of the dead; secondly, it must be shown that there is something rational and meaningful to do against it, i.e. that the political measures taken are rational - built on scientific knowledge.

If you introduce corona special laws with lockdowns and social distancing with subsequent vaccination programs as a normalization strategy as the solution to the problem, you must simply show that this is rational and scientifically based.

The need for scientific rationality is further reinforced by the fact that the government has taken up the right to perform extremely serious violations of citizens' rights in the form of forced vaccination of citizens suspected of being infected with COVID-19 and considered a threat to health.

In a professional dispute over the danger of corona SARS-CoV-2 and the nature of the present corona pandemic, a number of questions are central.

Ongoing court cases about corona in many countries call for well-documented scientific knowledge about corona.

The core questions to be asked about corona to enable the court to decide whether corona is dangerous - ie whether corona causes excess mortality or late injuries that make it professionally justified to introduce unconstitutional special corona laws and regulations and social lockdowns, given advice and instructions on corona like face masks, assembly bans, curfews etc. are:

1) Which questions are the question we need to ask to get the knowledge we need to arrive to scientifically based decisions about corona and the corona laws?

2) Can it be said with certainty that corona virus SARS-CoV2 is known, ie. isolated, crystallized, sequenced, etc.? Where did it come from - animals, humans, a lab in China?

3) Can they be said with certainty that corona virus SARS-CoV2 causes the disease COVID-19? Has it been shown in experiments that infected people develop the disease?

4) Does COVID-19 have a well-defined and recognizable disease picture that allows us to diagnose it - and is it so that it with certainty refers to corona virus SARS-CoV2, so that the disease can be diagnosed without a chemical test?

5) Are the PCR test and the other molecular tests scientifically valid for the detection of COVID-19's causative virus corona virus SARS-CoV2? How can we know this with certainty, when there is no "golden standard" - that is, any certain, prior scientific knowledge of the corona?

6) Is there excess mortality associated with the corona pandemic? If there is not, how can we know that the low mortality is not a consequence of the political corona measures? If there is, how can we know if this is caused by corona virus SARS-CoV2 and not by overtreatment, malpractice of putting people in ventilators without them needing it, adverse effects of the treatment such as hospital infections, psychosomatic factors such as anxiety and psychological problems due to (mis-)information, lockdowns, unemployment, domestic violence, economic damage etc. due to the policy measures, etc.?

7) Are there certainly proven late injuries in connection with the corona pandemic, and how have these been proven in scientific studies?

8) What have autopsies of the COVID-19 infected shown where they have been autopsied, for example in Hamburg?

9) Is the net effect on the health and well-being of societal lockdowns and corona special laws beneficial or harmful? The negative effects of the damage to the economy and people's global quality of life must be taken into account here.

10) Is the net effect on the health and well-being of face masks, extreme cleanliness, social distancing etc. beneficial or harmful?

11) Is the net effect on health and well-being of people avoiding social contact through minimizing group sizes, closing schools, sending people home to work, etc. beneficial or harmful?

12) Is the planned corona "vaccinations", which are all known to have considerable severe adverse effects, even death, a rational enterprise, in consideration of what we know about corona and what we know about the vaccines/mRNA vaccines?

It is important to emphasize that it requires considerable expertise to put together the right list of questions to answer the simple question: Is there a real, dangerous corona pandemic going on, and are the political corona measures we see in most countries productive or counterproductive to the population's health and happiness? This is why we urgently need the internationally recognized experts to inform us on these matters; the questions asked above are therefore for guidance only.

Some of the specific questions about corona etc. addressed by the conference

Is it true, as many scientists today believe, that we do not have a corona pandemic with excess mortality that can justify special laws, social distancing, mandatory facemasks and lockdown? The political measures seem to have little scientific meaning and they all violate people's constitutional rights, their human rights, and other fundamental rights.

Furthermore, if there is no real danger from the corona pandemic, the untested experimental corona "vaccination" (gene therapy) programs claimed to be able to "normalize" the situation in society, are not scientifically founded, while they are putting people to great danger.

This possibility makes it extremely important to establish the true scientific data about corona COVID-19.

1. We will review the scientific documentation (evidence) if it exists at all, that shows...

- a)... that SARS-CoV-2 virus is present and that it can be transmitted from human to human (as it has never been scientifically proven in an experiment that corona virus can infect a human).
- b)... that SARS-CoV-2 virus has been isolated.
- c)... that the mRNA code of the SARS-CoV-2 virus is known (sequenced).
- d)... that SARS-CoV-2 virus proteins are known and well described.

e)... that SARS-CoV-2 virus proteins can be artificially created or extracted from cultured viruses.

f)... that there is a specific SARS-CoV-2 virus which is the one spread during the pandemic and not many new coronaviruses, which are constantly being supplemented by additional, newly mutated corona viruses.

g)... that the COVID-19 PCR test can distinguish accurately and precisely between the different corona virus mutations.

h)... that the antibody test for COVID-19 can distinguish between the different corona virus mutations.

i)... that the other COVID-19 tests can distinguish between the different corona virus mutations

2. We will review the scientific documentation (evidence) if it exists at all, that shows...

a)... that there is a well-defined disease unit called COVID-19.

b)... that SARS-CoV-2 causes COVID-19.

c)... that COVID-19 causes excess mortality (ie is dangerous).

d)... that Professor Klaus Püschel's conclusion that no one died of COVID-19 from the autopsy study carried out in Hamburg on all those who had died of COVID-19 is incorrect.

e)... that COVID-19 causes a higher mortality rate than influenza (ie is more dangerous than influenza).

f)... that the excess mortality seen in certain countries is in fact due to the corona virus, and not the life-suppressing, state corona measures (special laws, etc.), as leading international experts and the scientific literature point to damage the quality of life, health and survival during corona pandemic.

3. We will review the scientific documentation (evidence) if it exists at all, that shows...

a)... that the PCR test for COVID-19, which is the basis for all COVID-19 statistics worldwide and for the testing of all COVID-19 vaccines, including the mRNA vaccines, is scientifically valid.

b)... that the antibody test for COVID-19 is scientifically valid.

c)... that the other tests (rapid tests, etc.) for COVID-19 are scientifically valid.

4. We will review the scientific documentation (evidence) if it exists at all, that shows...

a)... that it is at all possible and that it helps in mortality to prevent the spread of infection with corona virus.

b)... that in a city where we live together, it is possible to prevent the spread of corona infection.

c)... that 1) facemasks generally prevent the spread of corona infection and reduce colds and mortality; that 2) it helps on mortality that people wear facemasks in the public space, and 3) that it does not cause bacterial pneumonia, allergies and many other

things to wear facemasks, ie that the constant use of facemasks for many hours is not connected with considerable side effects, as the literature indicates is the case, 4) that there is no serious psychological damage as a result of long-term use of facemasks in public space or in the workplace, not least in the mentally ill and weak individuals. In connection with the latter, it is important to note the increasing incidence of domestic violence, suicide, and mental hospitalizations among young people in connection with the corona pandemic, as also described in the literature (); in this connection, it should be mentioned that the scientific literature points to extensive injuries in young people who are forced to wear facemasks for a long time.

d)... that the droplets we exhale carrying the virus are not smaller than the holes in the facemasks, so that it is not pointless to carry it to avoid infection with the virus.

e)... that surgical facemasks close so tightly to the face, that all or at least the dominant part of the exhaled air is filtered through it, even when it is worn loosely around the nose as almost all Danes wear it.

f)... that a facemask made of cloth which is also allowed also works.

g)... that the face visor also works, although it impossibly can remove droplets carried by the exhaled air.

h)... that facemasks do NOT weaken our communication with each other when we can not see each other's facial expressions as all psychological studies on the matter have shown is a crucial important part of body language, which as you know makes up more than 90% of our communication with each other. In particular, it must be shown that the emotional contact is NOT weakened by the facemask. The two points above are of course reinforced by social distancing, which is why the scientific evidence must also include this factor.

5.We will review the scientific documentation (evidence)

if it exists at all, that shows...

a)... that lockdown reduces mortality.

b)... that social distancing reduces mortality.

c)... that restricting the size of assembly reduces mortality.

d)... that hand sanitizing , the use of plastic gloves and other hygienic measures in public spaces reduce mortality.

e)... that corona special laws, corona regulations, etc. individually and in their entirety reduce mortality.

... In connection with the COVID-19 pandemic

6.We will review the scientific documentation (evidence)

if it exists at all, that shows...

a)... that we do not obtain herd immunity that keeps us all collectively protected when we are constantly and regularly infected with coronavirus.

b)... that virus does not mutate so fast that it is pointless to test against a single mutation, let alone vaccinate against it.

c)... that we do not benefit from being infected with the corona virus because it keeps us immune and thus healthy.

d)... that healthy people who carry the corona virus infection can infect others with so much virus that they get sick from it, as it is common knowledge from science that the cause of the disease is concentration-dependent and that a healthy carrier just releases a very small amount of virus (about 20 virus particles).

7.We will review the scientific documentation (evidence) if it exists at all, that shows...

a)... that there is a corona vaccine that is effective as it can reduce infection and reduce mortality (infection mortality rate), and not just alleviate the symptoms of corona infections which we do not have to a significant degree anyway.

b)... that the corona vaccines have been scientifically tested and found safe, understood as less dangerous than the corona virus SARS-CoV-2 (if it is admitted above that corona is not dangerous at all, it must be a vaccine without any side effects). In this connection, it can be mentioned that the mRNA vaccines have currently caused 157 deaths in the USA, which means that about 1 in 10,000 die immediately in connection with the vaccine.

c)... that the corona vaccines, including Pfizer- BioNTech and Modern mRNA gene therapy, have been scientifically tested according to the applicable drug testing standards; here it must also be shown that the testing is not based on the CPR method or other scientifically invalid test methods, or on statistics based on PCR testing of the population.
